SUMMARY	Detail-oriented Full Stack Web Developer with a wide range of technical skills and experience in offering creative IT solutions for real-world problems. Versed in leveraging cutting-edge technologies to design, implement, deploy, and maintain modern web applications. Sharp emotional intelligence, strong problem-solving skills, strategic mindset, and teamwork abilities.	
EDUCATION	Master of Science in Advanced Computer Science and IT Management (Degree) 2009 <i>University of Manchester, Manchester, United Kingdom</i> (ranked 27 th in the world) Thesis: Design Patterns Using Component-based Software Development <ul style="list-style-type: none"> Select courses: Building Web Applications, Research Skills and Prof Issue, IT Trends, Computer Security, Mobile Computing, IS Strategy & Enterprise, The Semantic Web 	
	Bachelor of Engineering in Computer Engineering- Software (Degree) 2007 <i>University of Science and Culture, Tehran, Iran</i> Thesis: Design and Development of Optical Character Recognition Software <ul style="list-style-type: none"> Select courses: Advanced Programming, Data Structures, Software Engineering, Machine Language and Assembly, Artificial Intelligence, Computer Networks, Principles of Database Design, Internet Engineering 	
CERTIFICATES	AWS Certified Developer – Associate (Certificate) 2019 <ul style="list-style-type: none"> Demonstrate an understanding of core AWS services, uses, and basic AWS architecture best practices Demonstrate proficiency in developing, deploying, and debugging cloud-based applications using AWS 	
	Full Stack Web Developer (Certificate) (Transcripts) 2018 <i>UCI Division of Continuing Education, Irvine, CA, United States</i> <ul style="list-style-type: none"> A12-week full-time classroom boot camp focused on gaining technical skills in Git, HTML5, CSS3, JavaScript, jQuery, Responsive Web Design (RWD), Bootstrap, Firebase, Handlebars.js, MySQL, Sequelize ORM, MongoDB, Express.js, React.js, Node.js, MERN, RESTful Web Services, AJAX, API, JSON, GitHub, Model–View–Controller (MVC), and Heroku 17+ assignments, 2 major group projects, and 1 major individual project 	
TECHNICAL SKILLS	Web Design Front-end Framework Back-end Frameworks Database Programming Languages Testing Frameworks Containerization Tools Deployment Cloud Computing Shell Scripting Version Control	HTML, CSS jQuery, Bootstrap, React.js, Material-UI Node.js (Express.js), Handlebars.js, Django, Flask MongoDB, MySQL, Firebase, GraphQL Python, JavaScript Jest Docker Heroku Amazon Web Services (AWS) Bash Git

RECENT
PROJECTS**A Facebook-like Social Media Web App** [Repository](#) | [Deployed Project](#)*A minimalist React-based Node.js social media web app*

- Polished and responsive UI design on all pages across all platforms and screen sizes
- Sign-up form including profile picture, username, and password with validation on all the inputs
- Sign-in (user authentication) using the same credentials with alert in case of wrong credentials
- Users may modify their profiles, create or modify events, and upload pictures
- RESTful APIs and HTML routes
- Technologies: React.js, Bootstrap 4, JSON Web Token (JWT), bcrypt, MongoDB, Node.js, Multer, Axios, Google Map API

Bit-error Concealment for VoIP and VoWLAN*Reusing packets damaged through wireless transmission*

- When the decoder fails to correct all the bit-errors that occurs through transmission, the application reconstructs damaged packets by means of DSSS Coding with Bit Errors and CRC using Java socket programming
- The project consists of 6 steps namely, 1-Receive ASCII text message, 2-Receive ASCII text string with CRC subject to bit-errors, 3-Receive ASCII text string with more bit-errors and CRC, 3-IEEE 802.11 DSSS Coding with Bit Errors and CRC, 4-Convolution coding and decoding, and 5-Speech transmission, and 6-packet-loss concealment

EL+ Reasoner*Normalizing an OWL ontology such that it contains only sub-sumption axioms*

- Designing and developing an EL+ reasoner using the OWL API, description Logic, and Protégé
- The reasoner takes in an OWL ontology and returns a normalized OWL ontology such that it contains only sub-sumption axioms and all atomic sub-sumptions entailed by the input

WORK
EXPERIENCE**Freelance Full Stack Web Developer**2018-
present**Project Manager**

2015-18

Sadra Trade and Services Co., Tehran, Iran

- Directly in charge of coordinating operations from follow-up on departure of cargo, managing customer service correspondence, endorsing daily status reports, and resolving critical issues impacting core business activities
- Worked with CEO to develop an efficient workflow and employed a new business strategy resulting in 10% increase in profits
- Actively generates process improvements and workflow enhancements

Full Stack Web Developer

2012-15

Gostareh System Co., Tehran, Iran

- Back-end developer creating dynamically generated web pages via JSP, accounting for 70% of the company's server-side code
- Contributed to the front-end code by redesigning HTML forms through collaboration with UI designer, making it faster and simpler
- Actively worked with the product manager to provide feedback and contribute to long-term digital strategy

Graduate Teaching Assistant

2010-11

University of Manchester, Manchester, United Kingdom

- TA for Distributed Computing and Engineering Web Applications
- Grading lab assignments, answering students' questions, and taking attendance
