SUMMARY	Detail-oriented software engineer with a wide range of technical skills and experience in offering creative IT solutions for real-world problems. Versed in leveraging cutting-edge technologies to design, implement, deploy, and maintain modern, scalable web applications. Humble spirit, inquisitive overachiever, strong problem-solving skills, and sharp emotional intelligence.	
EDUCATION	Master of Science in Advanced Computer Science and IT Management (Degree) 2009 <i>University of Manchester, Manchester, United Kingdom (ranked 27th in the world)</i> Thesis: Design Patterns Using Component-based Software Development <ul style="list-style-type: none"> Select courses: Building Web Applications, Research Skills and Prof Issue, IT Trends, Computer Security, Mobile Computing, IS Strategy & Enterprise, The Semantic Web 	
	Bachelor of Engineering in Computer Engineering- Software (Degree) 2007 <i>University of Science and Culture, Tehran, Iran</i> Thesis: Design and Development of Optical Character Recognition Software <ul style="list-style-type: none"> Select courses: Advanced Programming, Data Structures, Software Engineering, Machine Language and Assembly, Artificial Intelligence, Computer Networks, Principles of Database Design, Internet Engineering 	
CERTIFICATES	AWS Certified Developer – Associate (Certificate) 2019 <ul style="list-style-type: none"> Demonstrate an understanding of core AWS services, uses, and basic AWS architecture best practices Demonstrate proficiency in developing, deploying, and debugging cloud-based applications using AWS 	
	Full Stack Web Developer (Certificate) (Transcripts) 2018 <i>UCI Division of Continuing Education, Irvine, CA, United States</i> <ul style="list-style-type: none"> A12-week full-time classroom boot camp focused on gaining technical skills in Git, HTML5, CSS3, JavaScript, jQuery, Responsive Web Design (RWD), Bootstrap, Firebase, Handlebars.js, MySQL, Sequelize ORM, MongoDB, Express.js, React.js, Node.js, MERN, RESTful Web Services, AJAX, API, JSON, GitHub, Model–View–Controller (MVC), Webpack, and Heroku 17+ assignments, 2 major group projects, and 1 major individual project 	
TECHNICAL SKILLS	Web Design Front-end Back-end Databases Programming Languages Containerization Tools Module Bundlers Deployment Cloud Shell Scripting Version Control	HTML5, CSS3, Saas, Bootstrap4, RWD Vanilla JS, jQuery, React.js, Material-UI Node.js (Express.js), Handlebars.js MongoDB, MySQL Python3, JavaScript ES6 Docker Webpack Heroku, GitHub Amazon Web Services (AWS) Bash Git

RECENT
PROJECTS**A Facebook-like Social Media Web App** [GitHub Repo](#) | [Live Demo](#)*A minimalistic React-based Node.js social media web app*

- Polished and responsive UI design on all pages across all platforms and screen sizes
- Sign-up form including profile picture, username, and password with validation on all the inputs
- Sign-in (user authentication) using the same credentials with alert in case of wrong credentials
- Users may modify their profiles, create or modify events, and upload pictures
- Technologies: React.js, Bootstrap 4, JSON Web Token (JWT), bcrypt, MongoDB, Node.js, Multer, Axios, Google Map API, and RESTful APIs

Bit-error Concealment for VoIP and VoWLAN*Reusing packets damaged through wireless transmission*

- When the decoder fails to correct all the bit-errors that occurs through transmission, the application reconstructs damaged packets by means of DSSS Coding with Bit Errors and CRC
- The project consists of 6 steps namely, 1- Receive ASCII text message, 2- Receive ASCII text string with CRC subject to bit-errors, 3- Receive ASCII text string with more bit-errors and CRC, 3-IEEE 802.11 DSSS Coding with Bit Errors and CRC, 4- Convolution coding and decoding, and 5- Speech transmission, and 6- packet-loss concealment. (Socket Programming)

EL+ Reasoner*Normalizing an OWL ontology such that it contains only sub-sumption axioms*

- Designing and developing an EL+ reasoner using the OWL API, description Logic, and Protégé
- The reasoner takes in an OWL ontology and returns a normalized OWL ontology such that it contains only sub-sumption axioms and all atomic sub-sumptions entailed by the input

WORK
EXPERIENCE**Remote Software Engineering Mentor**

2020 - present

Thinkful

- Meeting with students 1-on-1 in online video sessions to provide technical and professional support as the student progresses through the curriculum.
- Hosting open Q&A an-hour-long group sessions. I work directly with groups of students, teaching them web dev that support their journey to become professionals.

Teaching Assistant

2019 - present

Trilogy Education, Irvine, CA, USA

- Teaching web development technologies 30 hours per week to 12-week classes of 24 students at the University of California, Irvine.
- Guiding students on their problem-solving thought processes, supporting them in their projects, providing feedback on their assignments

Project Manager

2015 - 18

Sadra Trade and Services, Tehran, Iran

- Directly in charge of coordinating operations from follow-up on the departure of cargo, managing customer service correspondence, endorsing the daily status reports, and resolving critical issues impacting core business activities
- Worked with CEO to develop an efficient workflow and employed a new business strategy resulting in a 10% increase in profits

Full Stack Web Developer

2012 - 15

Gostareh System, Tehran, Iran

- Back-end developer creating dynamically generated web pages via JSP, accounting for 70% of the company's server-side code
- Contributed to the front-end code by redesigning HTML forms
